

TRACK TEAM HAS PROSPECTS FOR MOST SUCCESSFUL YEAR IN ITS HISTORY

Many New Men Are Out Under the Supervision of
Coach Kanaly—Schedule Arranged

HAVE NUCLEUS FOR FAST RELAY TEAM

Over a hundred men are now reporting to Coach Kanaly four times a week for track. From these men it is possible that the best track team in the Institute's history will be picked, and an attractive schedule has been arranged by Manager Anderson. A great number of former preparatory school stars have reported, also many of the stars of last year's victorious team. Among the men on last year's team who have again donned the running shoes are Capt. Henry Pierce, who is capable of making 5 ft. 10 in. in the high jump, "Mich" Bawden, who placed 3rd in the half mile in the I. C. A. A. A. meet last spring.

Then there are men like Jim Downey, Palmer Scott, Oliver Barden, Orman, Henry Junod, and Larry Conant, who are great on the sprints. These will be the nucleus for a fast relay team this winter. Raymond and Hayes are back to participate in the shot and hammer event; Pender, Fletcher and Pierce in the pole vault; Friese and Pierce in the high jump, and I. H. Wilson in the broad jump. Mills who won 1st place in the high and low hurdles in the N. E. I. C. A. A. last spring is back on the job again. In the distance we still have a few good men of last years team. They are Stone, Bawden, and Capt. Dorr of the cross country team. Under the coaching of Frank Kanaly these men should develop to be even better than they were last year.

Every day more men are reporting for track and it is not too late to come out now. The freshmen class has sent out a bunch of good and unusually good men. Among these are Henry Allen the former Volkman School star. He has a record of 6 ft. 1 in. in the high jump, 22 ft. 3 in. in the broad jump and can go over the hurdles in perfect form. "Wink" Rollins who was on the Tech. Naval Aviation Team can do the quarter

PAUL ANDERSON '21

in less than 51 sec. and is a wonder running the half mile. Poole a former Exeter star in the sprints, Haskell the hurdler from Andover, and Arnold a distance man will shine for the Freshman team. There are many other good men out for track that will keep the old timers working for their places on the Varsity team this year.

The board track is in good shape and running practice can be held in almost any kind of weather. The S. A. T. C. Rifle Range has been given over to the track team for the high jump. Dr. Johnson is on the job running down any man on the squad who needs it. Coach Kanaly is giving his individual attention to each man. The work of every man on the squad is made out separately and each man has his own particular work to do according to his progress. Time trials are usually held every Saturday afternoon, so a record can be made of the ability of each man.

The Annual Board Track Handicap

VOO DOO NOTICE

All candidates for the Voo Doo are requested to report at the Voo Doo office daily between the hours of 1 to 2 or 5 to 6, excepting on Saturday. Work may be handed in and work will be assigned during these hours

SWIMMING TEAM SECURES A NEW PLUNGING COACH

Stewart McCollough Will Have Charge
of The Technology Plungers

The swimming team management has announced that it has secured the services of Stewart McCollough of Brookline to coach all men trying out for the plunging event on the swimming team. McCollough has a great reputation for turning out stars in plunging, among some of his former pupils being R. Bird, the interscholastic champion and record holder and Arthur E. Wales, '19 the star of Technology's Varsity team last year. The former has a record of 80 feet to his credit.

There is a scarcity of heavy men in this event at present and the new coach is very desirous of having some of the men weighing around two hundred pounds to come out for plunging. Among the men out now who are showing up well are Stallbird and O'Daly of the class of 1922 and Rogovin '21. O'Daly weighs about 235 pounds and is showing unusually good form.

The Institute should consider itself very fortunate in securing the services of McCollough and the students should support him by turning out some more good men for the event.

CIVIL ENGINEERING SOCIETY TO HOLD ELECTIONS WEDNESDAY

The election of officers for the Civil Engineering society will be open all day Wednesday, January 22d, in room 1345.

All men in courses I, XI, XVI will be allowed to vote, but those who are not members at present will be required to sign a promise on their ballots saying that they will join the society.

The nominees are as follows: President, H. P. Kepner, E. B. Murdough; Vice-president, N. A. Grover; Secretary, H. V. Howes; Treasurer, H. J. Green, E. P. Whitehead; Assistant Treasurer, C. H. Reed; Executive Committee, A. T. Glassett, L. D. Wilson.

STUDENTS TAX LEVIED

Corporation Places Tax on the
Entire Student Body

At a meeting of the Executive Committee of the Corporation last night it was decided to assess every student enrolled in the Institute the sum of four dollars, payable to the Bursar at once. This assessment, which is for the support of student activities and athletics, was in operation last year, its payment being compulsory only with regard to the freshman class and voluntary on the part of the upperclassmen. At the beginning of the present school year as the majority of activities had suspended and those that had survived were self-supporting, it was not deemed necessary to continue the tax, so it was set aside.

However, with the signing of the armistice and the disbanding of the S. A. T. C., the various activities were resumed, and as a consequence some financial help was needed for them to carry on their operation. At the registration this term a vote was held as to whether the student body in general wished the tax to be assessed this term, and an overwhelming majority signified their desire for the tax to be again collected. The action of the Committee was largely determined by this vote, so the tax will be placed upon the entire student body this time instead of the lower classes as was the case last year. The tax is payable at the Bursar's office, and all students are encouraged to pay it as soon as possible.

PADDLES, PAJAMAS AND SHOWERS TAKE PART IN '22 INITIATION

Freshmen Dwellers In Runkle Are Roused at Midnight To Participate In Solemn Rites

SPIRIT OF RIVALRY AWAKENED

Barred from all attempts to show their prowess on the athletic field or in the usual rope pull, the class of 1922 had its first taste of Institute spirit during the still watches of Monday night when those living in Runkle hall were routed from their beds and made unwilling participants in a show at which the sophomore were the chief spectators. More than that, the latent talent of the freshman class was brought smartly to the surface by the generous application of "paddles" and their ardor, thus aroused was cooled by immersion in ice-cold showers after which they were sent to bed to reflect on the shortcomings of their class. The idea of the initiation was inaugurated by the dormitory committee and the affair was managed by the chairman, Charles H. Reed '20. It was the first melee of its kind ever held at Technology and even the freshmen, after the party was over, agreed that it was a step in the right direction which was pointing conclusively towards the establishment of House traditions and a firmly founded Institute spirit.

All during the day, rumors had circulated about Runkle that some mischief was afoot but these premonitory rumblings were so faint that only a few of the freshmen took warning. Those who, in an effort to escape, were out for the evening, had returned by the time the first steps were taken and as a result nearly every '21-2 man in the hall was captured. The sophomores had secured a master key to all the rooms and armed with paddles of all descriptions, they entered and dragged forth their victims. Those who were dressed were forced to don pajamas in order to distinguish them from their superiors, the sophomores, who were fully clothed.

All lights in the halls were extinguished and those few freshmen who were sufficiently awake to resist, were quickly carried to the scene of the horrors on the fifth floor. Once there, they were taken separately and required to perform stunts indicated by the sophomores while a flashlight threw faint light over the entire assembly. After giving their exhibitions, the freshmen were required to lean over the back of a convenient chair while strong sophomores "paddled" them; the amount of

(Continued on page 2)

PERSONALS

Word has been received of the death on December 25th of Sergeant George Welles '19, of Company A, 303rd BatB-talion, Heavy Tank Corps.

Sergeant Root was a member of the class of 1919. In June, 1917, he volunteered for the Ambulance Service, and went across with the Technology Unit. Later he was transferred to the Camion Service with the French army, where he served six months, afterwards returning to this country. In the spring of 1919 he enlisted in the Heavy Tank Corps of the National Army, and went overseas in August. Soon after landing in England he was stricken with influenza, followed by pneumonia.

Sergeant Root was the son of Erasmus S. and Lillian A. D. Root, and the grandson of G. Welles Root of Hartford. He had just passed his twenty-second birthday.

Lieut. Webber was born on October 13th, 1891, the son of Mr. and Mrs. Walter H. Webber of North Brookfield. He graduated from the North Brookfield High School in 1909 entering Worcester Tech in the fall of the same year. In 1912, he transferred to Technology and secured his S. B. Degree in 1914 and an S. M. Degree in Electrical Engineering in 1915.

In 1916-16 he remained at the Institute as Research Assistant in the Electrical Engineering Research Laboratory. During the following months he was connected with the Cumberland County

Power and Light Co., Portland, Me., later acting as assistant to the Transmission Engineer of the N. Y. Central Road. In December 1917, he left this last position where advancement seemed certain to enter the Naval Service with the rank of ensign. Just previous to his death, he was advanced to the rank of Lieutenant, junior grade.

The funeral services were held at his home in North Brookfield, Mass., on Saturday last.

All Called On to Show Courage.

Whatever your sex or position, life is a battle in which you are to show your pluck; and woe be to the coward! Whether passed on a bed of sickness or a tented field, it is ever the same fair play and admits no foolish distinctions. Despair and postponement are cowardice and defeat. Men were born to succeed, not to fail.—Thoreau.

Nathaniel's "Jinx" Active.

Nathaniel Ripple had a terrible experience one afternoon when he was about twelve years old. He opened the doors of the buggy house and was backing the buggy in when the wind blew both doors shut. He propped them open with small sticks, but just as he reached the buggy tongue one of the sticks fell and the doors came around far enough to stop the buggy. A moment later Grandpa Ripple, who had just come down to the barn, said: "What's that you are saying, Nathaniel?"—Kansas City Star.

Avoid Brooding.

It is a salutary thing to regret past errors and sincerely resolve not to fall into them again, but it is a foolish and most dangerous thing to brood over mistakes we have made, sins we have committed. Brooding cannot possibly lead to healthy-minded action. Its tendency, rather is to develop a state of mind that may pass over into insanity. Yet many people indulge in this dangerous luxury of brooding. Particularly is this likely to be the case with people to whom life has not been as kind as it might have been.

GET INTO YOUR PROFESSIONAL SOCIETY

WHAT do you think comprises a good education? Do you ever stop to think what are the essentials of an Institute man's training? There is surely need of more than a working knowledge of Math. and Chem. and Applied. There is an important element that cannot be gained through such studies alone. This is the personal side of the training. That is a matter that a professional man cannot afford to neglect. However the main fault of an Institute man is his suspicion of anything that is not technical.

There is a professional society at the Institute for every course. The benefits to be derived from membership are just those that Institute men are criticized for undervaluing. A successful professional man must be acquainted with the men in his field. Also he must develop his personal side so that he can meet and do business with men in such a manner as to get results. This is where the professional societies will help him. Through them he is able to get acquainted with the men in his course and the allied courses and learn to meet and mix with men who are doing the same things that he is doing and get their views on matters of common interest. The programs of these societies are so arranged that important talks are given by leading men in the various professional fields on matters that are of direct interest to every one studying that branch of engineering. The professional societies will help you. Do not neglect to join one.

GIVE BASKET BALL A CHANCE

THERE are a great many men who are interested in starting up basket ball at the Institute as recognized sport. The men at the Dormitories are especially interested in starting inter-sectional games. Basket ball when once started will be popular here and probably be one of the leading branches of athletics. Nothing has been done with basket ball lately because there was no place to play. Now, however, that the Walker is open the men in the Dormitories have tried to get permission to have the game played there. So far, however, they have been disappointed. We hope that the athletic committee will take the matter up and either give permission to have the game played in the Walker Memorial or suggest some substitute.

START UP THE ORCHESTRA

THERE has been unusual difficulty this year in getting the orchestra started. The main trouble seems to be with the management of the orchestra themselves. They have failed to get the right kind of publicity and show the candidates that this activity is as attractive as any other. The M. I. T. Orchestra is one of the recognized activities at the Institute, and with Mr. Howard backing it up there is no reason why an efficient organization could not be gotten together. What the management of the orchestra needs to do is outline a schedule for the year including a trip to New York, for instance, that would make the activity more attractive to the new men.

TRACK TEAM

(Continued from page 1)
Meet is scheduled as usual this year. It will be held about the 1st of February. Prizes will be awarded to the men placing first, second or third in the meet. The Sophomore-Freshman Dual Meet and the Annual Board Track Inter-class Meet will also be held. Cups will be awarded to the winning classes in both of these meets. A great deal of interest has already been shown in the track house towards these meets.

There are seven men in the competition for assistant track manager, and it is a very close race at present. The men are: Gray, Heffernan, May, Herbert, Folinsbee, Walsh, and Vilett. From these men two will be picked at the end of this term for assistant managers and a third for the manager of the Freshmen Track Team.

A tentative winter schedule has been arranged by Manager Paul Anderson as follows:

Handicap track meet on board track, Feb. 1st.

Sophomore Meet with Worcester Acad. in Worcester, Feb. 8th.

Freshmen Meet with Lowell High School in Lowell, Feb. 15th.

First Naval District Indoor Track Meet, East Armory, Boston, Feb. 15th.

Inter-Class Board Track Meet, Feb. 22nd.

Annual B. A. A. Indoor Track Meet, March 1st.

Milrose Athletic Club Indoor Meet, New York, March 12th.

Freshmen-Sophomore Board Track Meet, March 8th.

Penna. Relay Carnival, Philadelphia, in April.

The team will meet Dartmouth in the B. A. A. Indoor Track Meet. The Freshmen will meet the Dartmouth Freshman and the Holy Cross Freshmen. The Varsity will probably meet Harvard in the First Naval District Track Meet. There is also an indoor track meet with the Lynn English High School which can probably be arranged for some date in February for the Sophomores. If the interest in track continues to grow the Institute will have the best track team in its history this coming season, and the management desires that all men interested in track come out for some event.

FROSH INITIATED

(Continued from page 1)

their medicine depending on whether or not their stunt had met with the approval of the upper classmen.

Shower Bath Degree Starts Trouble

The next step in the proceedings was the shower bath degree and for this, the men were taken from the chamber of horrors to the showers on the fifth floor. There they were blindfolded and after having felt of a shower which was scalding hot, they were thrown into one which was ice-cold. It was during this step in the game that most of the trouble for the sophomores arose. In their zeal to do a thorough job, they had secured so many freshmen that the numbers of capturers and captured were nearly equal and by this time, the freshmen had become sufficiently awake to fight.

Joseph Christoph and his room-mate "Dan" Coogan became almost unmanageable and it was only with a mass attack that the sophomores were able to carry out their plans. Another unwilling and "scrappy" victim was W. E. Clarke, Jr., who was incensed particularly against his luck. He is not officially a resident of the dormitory but having been visiting with Christoph during the evening, had decided to spend the night there, little thinking of the trials that were in store for him. All these men were afterwards congratulated by Reed for their spirit in the mix-up.

Proclamation Read to Freshmen

While the men were assembled in the torture chamber Reed read their fate in the form of a proclamation entitled "The last words of cheer to '22." "This announcement from the powers" began Reed, "spoken the nineteenth day of January in the Judgment room and chamber of horrors, Runkle hall." "Whereas in the course of human events," Reed continued, "famous men in this house have become filled with sublime realization of the opportunities for greatness which are within our grasp; we have after deep meditation and sedate reflection decided upon a program of reforms and innovations so that Runkle's star of glory shall rise to the dizzyest and most ethereal heights

of Technology's brilliant heavens. Being of generous mind and a disposing disposition we accept as a duty the task of acquainting our new and inexperienced brethren with the ways whereby greatness may be achieved for the common good.

"But first you must acquit yourselves as men of fortitude and poise. You stand before us as a miserable herd of babbling barbarians incapable of reason or understanding. But we are foregathered here so that the rabble may eat of the crumbs of learning which will be cast upon the waters, and soon the barbarian may become soattered upon knowledge that he may take his place in the council chamber of the Chief Priests and the Scribes and the Elders. Brethren, if at first our maxima of virtue seem but gall and wormwood be not of faint heart, for in the end all will reign supreme. Hearts of steel may be fashioned only in the hottest flame.

"Dwellers in these Olympian realms of Runkle—oh thrice seven times seventh heaven—must needs be inflexible in action and in spirit. You are possessed of embryonic greatness but it lies latent. To arouse your spirits that they may equal ours seems a duty. With you the spirit may be willing but the flesh is weak. To purge you of frailty is the night's task. And thus have we heated the fiery furnaces seven times hot.

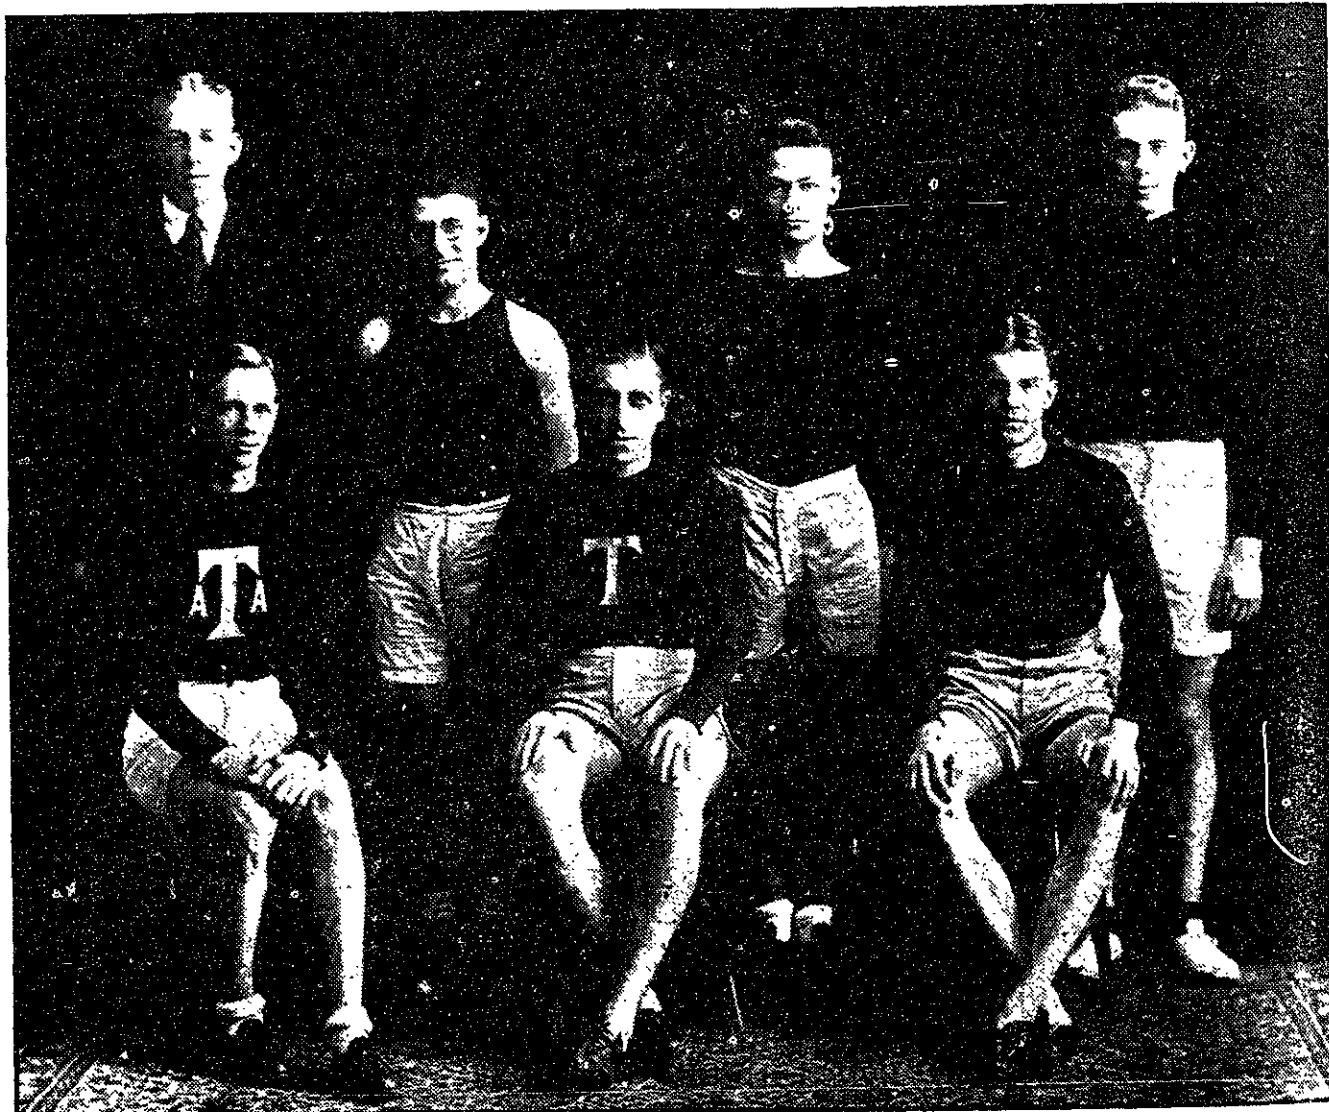

"And when this is past and your mortal weaknesses have fled we may dwell together in brotherly intimacy and affection and the spirit of living will be enhanced. Thus our fame will wax great and will spread to the far corners of the earth, yea even unto the darkest portions of Nichols and Atkinson.

"But prepare! The stirring times are at hand. Yet welcome them for great men arise at a crisis, and then too, even slothful sluggards become doers of deeds, and withal there is great good.

"In the Judgment Room you have been weighed in the balance and found wanting. The sages have noted out such torments as will drive the devils from your frail souls. In our wisdom

(Continued on Page 3)

CHAMPIONS OF LAST YEAR—CHAMPIONS TO BE

The 1918 track team which met with unusual good fortune last year. In the Boston Athletic Association meet, the short relay team defeated Harvard, the long relay team outran Dartmouth, and the freshman relay succeeded in giving a drubbing to the freshmen team of Holy Cross. In the New England Inter-collegiate the cross country team secured first place, while in the all American inter-collegiate they placed third. The relay team which was sent to Penn. State later in the season ran away with the first prize. To sum up the season, notwithstanding unfavorable circumstances the track team accomplished all that the coach and the captain could hope for.

CLASS SPIRIT

THE lack of class spirit at Technology is sad. There are no traditions regulating the conduct of freshmen here as in all other colleges. The result is that the new men come to the Institute and no attention is ever paid to them. With freshman regulations published every year by the sophomore class in a proclamation which would prescribe that freshmen should do certain traditional things and be forbidden to do certain others, there would soon be enough rivalry aroused by the attempts of the sophs to carry out their rules to distinguish one class from another and start some sort of class spirit. Consider the matter, Institute Committee!

During the past week, M. I. T. lost another graduate who was in the service of his country, in the person of Lieut. Leon Hubert Webber '14, VI S.M. '15. Lieut. Webber, U. S. N. R. F., died of pneumonia on January 13th at Birmingham, Ala., where he had been engaged in duty as a Naval Inspector of Ordnance. At the time of his death, he was assigned to inspect ordnance supplies manufactured in this country for use abroad. He covered the Southeastern District which includes states south of Virginia to the Gulf and west to the Mississippi.

we have fathomed the deep abyss of your shortcomings and after the true manner of Technology have devised a procedure whereby the dark and shadowy valleys of ignorance in your make-up may be most efficiently put at naught.

"Though the ways may be devious and the paths strange and foreboding, think of joys to come, and so be strong. "God help you—for no one else would give you a thought."

Freshmen Display 1922 Banner

The Runkle initiation was planned only as a forerunner of similar affairs in the other houses and it was impressed upon the men that, next year when other new men entered the dorms, their turn at similar work would come. That the fray started the first class spirit which has been in evidence about the Institute for some time was evidenced by the 1922 Technology banner which was flaunting in the breezes on one of the buildings Monday morning. This emblem of class, which had been purchased by a group of freshmen was quickly hauled down by "Eddie" O'Hearn '21, who soon saw the blemish on the landscape. Further developments in class rivalry are expected momentarily and it is possible that the sophomores will endeavor to restrict the liberty of the freshmen by regulations.

accounts are to be kept at was discussed and it was suggested that accounts be kept at the State Street Trust.

It was moved and seconded that a dinner precede the Finance Committee Meeting and that the meetings be held the first Tuesday after the 8th of each month. Passed.

Reports must be handed in to the Chairman before the 6th of each month. The meeting adjourned at 5:45 P.M.
RICHARD McKAY,
Secretary Finance Committee.

A. I. E. E. TO HOLD MEETING

The Electrical Engineering Society will hold a short business session Wednesday night at 7:15 P.M. in room 4-370 at which they will be addressed by former President Costelloe. In addition there will be a smoker and Professor Franklin has been secured as the principal speaker of the evening. His topic will be the "Mechanical Phenomena of Electricity." His lecture on this subject last year drew such a large crowd and many were consequently unable to hear that it has been decided to have the lecture repeated.

FINANCE COMMITTEE MEETING

The first meeting of the Finance Committee for the year 1919 was called to order by Chairman Burt, '20 on Friday, Jan. 17th at 5 P.M.

Representatives from the following activities were present: Track, Swimming, Crew, Rifle Club, E. E. Society, Dormitory Committee, Tech Show.

A fee of 50 cents is to be assessed for absences after this date.

Richard McKay, '21 was elected Secretary.

The Dining Service at Walker Memorial was opened September 4, 1917.

Since then, over one million, three hundred thousand (1,300,000) meals have been served—mostly to Army and Navy Aviation Cadets.

As many as four thousand six hundred (4,600) have been cared for in one day.

The kitchens, service rooms, as well as the preparation and handling of food, have been repeatedly inspected by medical officers of both services.

Their reports have been uniformly favorable.

The number of casualties among the diners has been insignificant.

All of which, though mildly interesting, is preliminary.

On Monday, January 20th, with the departure of the last Company in the Naval Aviation Detachment, the dining service in this building will be exclusively for M. I. T. students and other persons connected with the Institute.

This is what the Alumni and other donors of the building intended.

Its only excuse for existence is to provide clean, wholesome food at as moderate a price as possible.

The Main Dining Hall has a seating capacity of six hundred (600).

It is equipped for cafeteria service and designed to handle about twenty (20) men per minute.

If demanded, this service can be tripled on twenty-four hours' notice.

The Grill Room with table service is also open to all students and persons connected with the Institute.

It is a convenient and satisfactory place to take your relatives and friends when they visit the Institute.

No college dining service exists without criticism.

There is also criticism when it ceases to exist—as at Yale last week.

It is more than possible that a service which has been entirely satisfactory to officers and men in military and naval service will not prove satisfactory to M. I. T. Students.

Will you, therefore, make it your business to investigate this service and offer what suggestion or criticism you think is necessary. Please consider both the quality and quantity of food—the service and the price.

Do not accept anybody's word for it—investigate YOURSELF.

Here is a sample menu:— Thursday, Jan. 16th, 1919,

GLEE CLUB MEMBERS CHOSEN

The following men have been retained on the TECHNOLOGY GLEE CLUB.

First Tenors—Abern, Ackerly, Akers, Baker, Burnham, Dorr, Hoops, Honiss, Johnston, Knight, Lord, Nichols, Saxe, Ward, Davidson, F. G.

Second Tenors—Carvan, Clark, Hill, Jetter, Leland, Tiley, Riley, Safford, First Bases—Adicks, Bishops, Fletcher, Coachman, Davis, Greenblatt, Grover, Hanson, Norton, Lloyd, Peterson, Stevenson, Whitaker, Walch, Williams.

Second Bases—Bartholomen, Conant, Couch, Dutton, Davidson, H. O., Herman, Houghton, Liecny, Lunden, Wirt.

Piano—Rogers.

These men will meet on Mondays and Thursdays in 10-250 at five o'clock for practice for the concert as announced in the last TECH, for Tuesday, February 4 at the Franklin Square House. Those not appearing at these rehearsals will lose fifty cents out of their \$5.00 deposit unless they have a good excuse for absence.

VOO DOO MEETING HELD

Last Monday there was a meeting of all competitors for the Voo Doo at which work was assigned to the men out for the various departments. The first issue of the Voo Doo will appear about the middle of next month, and all material for this issue must be in by February 1st. At present no permanent offices have been made but the elections for the managing positions will probably be made on Friday. The advertising department is getting well under way. Several covers have been submitted to the art department, any other covers should be presented before Saturday at noon.

The Voo Doo will appear monthly very similar in form to Life. The management has announced that there will be no subscriptions taken, all the sales being in cash when issued. Persons having cartoons, funny stories, or suggestions are asked to send them in to the Voo Doo office.
